Exploring the Effects of Environmental Factors on the Performance of Industrial Crops

環境要因が工芸作物の生育に及ぼす影響

Dr. Aidil Azhar

(Assistant Professor, Vocational College, IPB University)

The inconsistency of productivity and quality output of industrial crops poses a significant challenge to the plantation industry. To address this issue, continuous data exploration and collection in industrial crop plantations are essential for understanding how plants respond to dynamic environmental conditions, ultimately informing the development of cultivation standards. In this seminar, we will share our field data collection experiences based on case studies of sago palm, coffee, oil palm, and rubber tree plantations.

参加希望の方はQRコードから参加登録をお願いします。
オンライン参加希望の方は、開催までにZoomのリンクをお送りします。

Please apply in advance for the participation through QR code.

For online participants, we will send the participation Zoom URL before the seminar.
